

## **Privacy Policy**

This privacy policy sets how the Baby Monitor App and its accompanied server software uses and protects your personal information.

### **What we collect:**

We do not collect any information through our Android app and its Mac server. The sole purpose of this app/server software combination is streaming baby audio from your Android device to your Mac computer through your local Wi-Fi network.

Besides that, we will ask your name and e-mail address if you contact us to get support, to notify a bug or to give a suggestion about our software. In this case, the name and the e-mail we ask are solely for communication purposes and we will not give your info to a third party unless required by law and we will not use it for marketing purposes.

### **Security:**

Our app and its server communicates within your local Wi-Fi network and do not go out to the Internet. So the audio stream cannot be listened by third parties unless your local Wi-Fi network is not password protected. The security of your local Wi-Fi network is your responsibility. Do not give your Wi-Fi password to the people you don't trust or do not use public Wi-Fi to use this app.

### **Link to other website:**

This app gives only one link to the website which provides the server software for this app. However, once you have used this link with your computer to download our server software, you should note that we do not have any control over that other website. Therefore, we cannot be responsible for protection and the privacy of any information which you provide whilst visiting that site and that site is not governed by this privacy statement. You should exercise caution and look at the privacy statement applicable to the website in question.

If you have any questions and concerns about your privacy, please contact us at [info.babymonitor@gmail.com](mailto:info.babymonitor@gmail.com)
